WORK EXPERIENCE

2020 - 2022 — **ENGAGENCY**

Tech Lead/Full Stack Web Developer

As a Sitecore Developer and Lead Tech, I supported large clients and worked with them on complex problems to make sure they delivered the best web experience possible to their customers. Responsibilities included managing small teams of junior devs, and working with PMs to meet schedules and deadlines.

2015 - 2020 — **LIFESIZE**

Full-Stack Web Developer

I developed and maintained an international website with a small team for the world's leader in high definition video conferencing. I was also responsible for code review, project architecture, design, and training junior devs.

2013 - 2014 — **BRIGHTBOX, INC.**

Web Developer, Server Admin, IT Support

I was responsible for building million-dollar brands, converting PSDs to HTML, coding out email blasts, and building out MODX and Wordpress websites.

2010 - 2012 — **WICKEYWARE, LLC**

Senior Programmer, Audio Engineer

I developed, designed, coded, and tested a suite of iPhone and Android mobile apps on a small team.

2007 - 2010 — **WESTERN MICHIGAN LIBRARIES**

Systems/Network Administrator

I worked using a ticket system, helped structure the Libraries' wiki, and participated in various hardware and software rollouts to over 200 end users.

EDUCATION

2006 - 2011

W **Western Michigan University**

Bachelor's Degree: Computer Science

Minor: Mathematics

WORK SAMPLES

LIFESIZE WEBSITE

Lifesize is the world's leader in HD video conferencing. I helped develop and maintain the driver of the business, the website.

https://lifesize.com/

MINES OF MARS

Mines of Mars is a procedural atmospheric RPG mining game that is inspired by games like Metroid and Motherload that I created.
